

Brain Game 1

Students questionnaire

1. Can you remember the names of the four different cortexes in the brain?
Draw a simple diagramme of our brain showing the four basic areas or cortex;
remember that one cortex is in two halves, one on each sides of the brain.
2. Show where you stood in the brain game?
3. Where you a body part like an eye or a neuron, which is part of the brains
tissue?
4. Which cortex were you connected to?
5. How were messages sent around the brain in this game?
6. How do you think messages are sent around our brains?
7. What happened to the messages when the brain in the game gets damaged?
8. Do you think this could be the same in our brains?
